FUTURE ADDITIONS of Variables

NRG Metrics is trying to create a unique database for all the aspects of corporate governance. That is why we work hard in order to cover all the needs of the researchers. From the next collection procedure (financial year 2016) we are thinking to work with one from the following topics:

Family Ownership

Executive Compensation

Pyramidal Ownership

Control Enhancing Mechanisms

We need your opinion. Mail at info@ngmetrics.com

NEW Variables

NRG Metrics is not a static database. We are trying every year to extend the variables of our sample. From the current measurement (2015) the users will be able to find in our database 7 new variables. We select the variables we use based on our clients' needs and on the latest scientific literature on corporate governance.

Founders

Industry Expertise

Political Connections
(reason for being p.c.: Member of Parliament, local authorities etc)

Financial Expertise
(reason for being f.e.: ceo, cfo, controller etc.)

Education

Employee Representative

Company Representative

Directors and Officers Database

In September 2017 we are going to launch our new and special database for Directors and Officers. The user will be able to search by using multiple criteria (more than 50) in order to find the sample that he is looking for. The main characteristics of this special database will be the following:

120.000 Directors and Officers

50 variables

Advanced Search

Short CV

Directors' Network
