

NRG Metrics is the only Database in which researchers can combine 6 different datasets and more than 300 metrics without having to use another Database. We are the only Database in the world that provides a Family Firms Dataset and the only Database that provides the most complete set of variables for the Ownership Structure. In addition to these two datasets, we provide our customers with a wide range of variables related to Corporate Governance and Directors & Officers.

Our goal is to create the most comprehensive database for Corporate Governance researchers. In this direction, last year we added THE Compensation Dataset and this year we are adding THE Audit Dataset. Academic researchers can choose either individual datasets (Compensation, Audit, or Directors & Officers) or a full package of the 6 different datasets at very competitive prices.

CORPORATE GOVERNANCE

FAMILY FIRMS

6 DATASETS

OWNERSHIP STRUCTURE

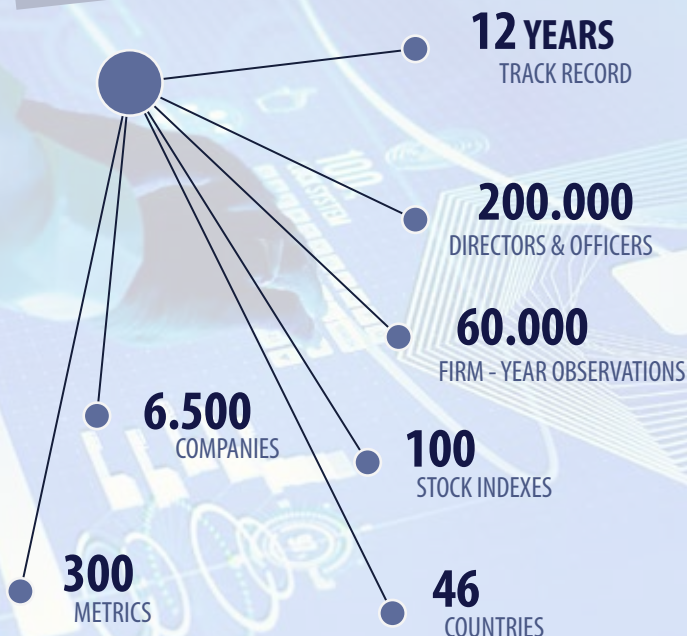

COMPENSATION

DIRECTORS & OFFICERS

AUDIT
